📄 SUMMARY

- 6+ years of experience in *Automation Testing, Manual Testing, Functional testing and Database testing on web-based applications.*
 - Good experience in *selenium WebDriver with Java.*
 - Good experience in *Web services, API Testing with the help of Postman.*
 - Good experience in *SQL query*
 - Good experience in *Retailer & Banking Domain.*
-

TECHNICAL SKILLS

Automation Tools: Selenium
WebDriver, Playwright with
Typescript, Maven, TestNG.

Language: Java, TypeScript

PEGA Application: PEGA
BPM, PEGA Case
Management, Business
Rules,SLA,E2E
lifecycle,Routing

API Testing: Postman, Bruno

Database: MySQL, SQL Queries

Tools: Maven, GitHub, Jenkins, Jira,
Rally

Methodologies: Agile, Scrum.

AI Tools: Amazon_q,Cursor,
Co-pilot,Chat GPT

📁 PROJECTS

Project Name: Mortgage Discharge [Pega
application]

Domain: Banking Services

Client: National Austria Bank

- Analyzed Functional Requirement

Specifications (FRS) and technical
documents for **PEGA applications.**

- Designed and executed comprehensive test
scenarios and test cases for PEGA Case
Management applications.

• Validated the complete **PEGA case lifecycle,**
including Case Creation, Assignments,
Approvals, Document Verification, and
Case Closure.

- Validated end-to-end case lifecycle, workflow
routing, assign approvals & status transitions.

• Tested **Service Level Agreements (SLA)** to
ensure timely case processing, escalation, and
deadline management. Preparing TSR
Documentation.

- Verified role-based user access and security
permissions for different user groups.

email notifications and customer communications
generated the application.

- Tested local actions such as Reindex, Rework,
Transfer Case, and Bank Action Required to ensure
proper case processing.

• Performed Functional, Regression, Integration, and
User Acceptance Testing (UAT).

- Validated business rules, case routing, work queues,
and approval workflows.

• Executed backend data validation using SQL queries
and verified data integrity across systems.

Project Name: Input business **Domain:** Retailer

Client: Absolute Pvt Ltd

- Analyzed business requirements and prepared test
scenarios and test cases for Loan Review
Modification.

• Performing Re-testing of defects and system
regression testing making sure present defect has
not to lead to some other defect in the application.

- Prepare the test cases from use cases.

• Responsible for Smoke testing.

- Preparing daily reports for the executions of the test
cases.

• participated in the scrum meeting to discuss project
progress reports every day.

- Perform sanity testing, Regression testing, end to
end testing.

Project Name: Loan Review Modification [Pega
Application] **Domain:** Banking **Client:** NAB

- Analyzed business requirements and prepared
comprehensive test scenarios and test cases for
LRM workflows in PEGA app.

EDUCATION

Bachelor of Engineering from
SRTMUN Nanded[2015]

ORGANISATIONS

Radiant Systems (India) private Ltd
QA Test Engineer
06/2025 – 04/2026 | Gurgaon

Upaj AI Solutions private Ltd
QA Test Engineer
01/2023 – 11/2024

NT Private Ltd
QA Analyst
08/2019 – 01/2023

- Executed **API Testing** using **Postman** and **Bruno** to validate REST APIs, request/response payloads, authentication, business logic, and HTTP status codes.
