

GOPAL KARHALE

QA TEST ENGINEER | AUTOMATION & MANUAL TESTING

Pune, India | gopalkarhale1@outlook.com | 07030125525 | linkedin.com/in/gopal-karhale

PROFESSIONAL SUMMARY

Immediate Joiner-QA Test Engineer with 6+ years of experience across manual and automation testing of web-based applications, with hands-on exposure to Selenium WebDriver with Java and Playwright with TypeScript. Experienced in functional, regression, smoke, sanity, integration, UAT, API, database, end-to-end and accessibility testing. Strong experience in Pega case-management applications, banking and retailer-domain workflows, REST API validation using Postman/Bruno, SQL-based backend validation, defect management, Agile/Scrum and CI-oriented test execution.

CORE SKILLS

Testing: Manual Testing, Functional, Regression, Retesting, Smoke, Sanity, Integration, System, UAT, E2E, UI.

Automation: Selenium WebDriver, Playwright, Page Object Model (POM), Data-Driven Testing, BDD/Cucumber, TestNG, Maven

Languages: Java, TypeScript

API & Web Services: REST API Testing, Postman, Bruno, request/response validation, HTTP status codes, authentication and business-rule validation

Database: MySQL, SQL Queries, backend/data-integrity validation

Pega: Pega BPM, Case Management, Case Lifecycle, Business Rules, SLA, Routing, Work Queues, Flow Actions, Harnesses, Screen Flows

CI/CD & Tools: Git, GitHub, Jenkins, Jira, Rally

Methodology: Agile, Scrum, SDLC, STLC, Defect Life Cycle

AI Tools: Amazon Q, GitHub Copilot, Cursor, ChatGPT

PROFESSIONAL EXPERIENCE

Radiant Systems (India) Pvt Ltd | QA Test Engineer | 06/2025 – 04/2026 | Gurgaon

- application. Tested Pega workflows, Case Types, Flow Actions, Sections, Harnesses and Screen Flows across end-to-end business scenarios.
- Validated case routing, Work Queues, Work Groups, Operator/Assignment Routing and business-rule driven processing.
- Validated role-based access for Business Admin, Case Worker, Case Manager and other application roles.
- Performed API testing using Postman and Bruno; validated request/response payloads, authentication, business logic and HTTP status codes.
- Performed SQL-based backend validation to verify data integrity and business-rule outcomes.
- Performed WCAG accessibility testing covering keyboard navigation, color contrast, form labels and screen-reader compatibility.
- Worked with Business Analysts, Developers, Product Owners and stakeholders to clarify requirements, analyze defects and validate business functionality.

Upaj AI Solutions Pvt Ltd | QA Test Engineer | 01/2023 – 11/2024

- Analyzed business requirements and prepared test scenarios and test cases for Loan Review Modification (LRM) workflows.
- Executed smoke, sanity, regression, retesting and end-to-end testing; prepared execution status and daily test reports.
- Validated defects through retesting and regression to ensure fixes did not introduce related issues.
- Participated in Agile/Scrum ceremonies and collaborated with the project team on testing status and release activities.

NT Private Ltd | QA Analyst | 08/2019 – 01/2023

- Executed manual testing for web-based applications using Selenium WebDriver with Java, TestNG, Maven and POM.
- Created and maintained automation test classes and reusable Page Object Model components.
- Performed functional, regression, smoke, sanity, UI and compatibility testing and supported defect life-cycle activities.
- Worked with XPath and web-element identification; handled pop-ups, list boxes and browser actions in Selenium.
- Used GitHub for repository management and Jenkins for continuous-integration-oriented test execution.
- Performed API/Web-service testing using Postman and Bruno and validated backend data using MySQL/SQL queries.
- Participated in Scrum meetings, prepared test-status updates and collaborated with developers and business stakeholders.

KEY PROJECT EXPERIENCE

Mortgage Discharge – Pega Application | Banking Services | Client: National Australian Bank (NAB)

- Analyzed Functional Requirement Specifications (FRS) and technical documents for Pega applications.

- Designed and executed test scenarios for complete case lifecycle: creation, assignment, approval, document verification, decisioning, notification and closure.
- Validated SLA goals, deadlines, escalations, urgency adjustments, business rules and approval workflows.
- Tested local actions including Reindex, Rework, Transfer Case and Bank Action Required.
- Validated correspondence and email/customer communications and role-based permissions.
- Performed Functional, Regression, Integration and UAT testing with SQL-based data validation.

Loan Review Modification (LRM) – Pega Application | Banking Domain | Client: National Australian Bank (NAB)

- Prepared comprehensive test scenarios and test cases from business requirements and use cases.
- Validated E2E workflows, routing, assignments, approvals, status transitions and business-rule behavior.
- Performed smoke, sanity, regression, retesting and end-to-end testing and tracked defects through closure.

AUTOMATION FRAMEWORK & CI/CD EXPOSURE

- Selenium + Java + TestNG + Maven + POM for maintainable web automation.
- Playwright + TypeScript for modern browser and end-to-end automation.
- BDD/Cucumber and Data-Driven Testing exposure for reusable test scenarios.
- Git/GitHub → Jenkins → Maven/TestNG → automated test execution and reporting workflow.
- Experience with assertions, annotations, XPath, reusable page objects, defect reporting and test-status reporting.

EDUCATION

Bachelor of Engineering (B.E.) – SRTMUN, Nanded | 2015

ADDITIONAL INFORMATION

- Immediate Joiner.
- Open to QA Test Engineer, Software QA Engineer and Automation Test Engineer opportunities.
- Preferred locations: Pune, Mumbai and Hyderabad.
